## **Marine and Coastal Geographical Information Systems (Research Monographs in GIS)**

Marine and coastal applications of GIS are finally gaining wide acceptance in scientific as well as GIS communities, and cover the fields of deep sea geology, chemistry and biology, and coastal geology, biology, engineering and resource management. Comprising rigorous contributions from a group of leading scholars in marine and coastal GIS, this book will inspire and stimulate continued research in this important new application domain.

Launched as a project to mark the UN International Year of the Ocean (1998) and supported by the International Geographical Union's Commission on Coastal Systems, this book covers progress and research in the marine and coastal realms, in the areas of theory, applications and empirical results. It is the first book of its kind to address basic and applied scientific problems in deep sea and coastal science using GIS and remote sensing technologies. It is designed for GIS and remote sensing specialists, but also for those with an interest in oceans, lakes and shores. Coverage ranges from seafloor spreading centres to Exclusive Economic Zones to microscale coastal habitats; and techniques include submersibles, computer modelling, image display, 3-D temporal data visualization, and development and application of new algorithms and spatial data structures. It illustrates the broad usage of GIS, image processing, and computer modelling in deep sea and coastal environments, and also addresses important institutional issues arising out of the use of these technologies.

### **From reader reviews:**

#### **Bobbie Flores:**

Book is written, printed, or descriptive for everything. You can realize everything you want by a e-book. Book has a different type. We all know that that book is important issue to bring us around the world. Alongside that you can your reading expertise was fluently. A guide Marine and Coastal Geographical Information Systems (Research Monographs in GIS) will make you to always be smarter. You can feel far more confidence if you can know about everything. But some of you think this open or reading a new book make you bored. It is not make you fun. Why they can be thought like that? Have you looking for best book or suitable book with you?

#### **Charles McCreery:**

As people who live in the modest era should be update about what going on or data even knowledge to make them keep up with the era and that is always change and advance. Some of you maybe can update themselves by looking at books. It is a good choice to suit your needs but the problems coming to anyone is you don't know what one you should start with. This Marine and Coastal Geographical Information Systems (Research Monographs in GIS) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

#### **Timothy Wrobel:**

Why? Because this Marine and Coastal Geographical Information Systems (Research Monographs in GIS) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will jolt you with the secret it inside. Reading this book next to it was fantastic author who write the book in such awesome way makes the content on the inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of advantages than the other book get such as help improving your skill and your critical thinking approach. So , still want to delay having that book? If I had been you I will go to the book store hurriedly.

#### **Donald Barber:**

Don't be worry should you be afraid that this book will certainly filled the space in your house, you may have it in e-book means, more simple and reachable. That Marine and Coastal Geographical Information Systems (Research Monographs in GIS) can give you a lot of pals because by you looking at this one book you have issue that they don't and make an individual more like an interesting person. This particular book can be one of one step for you to get success. This book offer you information that might be your friend doesn't recognize, by knowing more than some other make you to be great people. So , why hesitate? Let's have Marine and Coastal Geographical Information Systems (Research Monographs in GIS).
