Special Relativity (The M.I.T. Introductory Physics Series) A.P. French

***The M.I.T. Introductory Physics Series* is the result of a program of careful study, planning, and development that began in 1960.**

The education Research Center at the Massachusetts Institute of Technology (formerly the Science Teaching Center) was established to study the process of instruction, aids thereto, and the learning process itself, with special reference to science teaching at the university level. Generous support from the National Science Foundation and from the Kettering, Shell, Victoria, W. T. Grant, and Bing Foundations provided the means for assembling and maintaining an experienced staff to cooperate with members of the Institute's Physics Department in the examination, improvement, and development of physics curriculum materials for students planning a career in the sciences.

After careful analysis of objectives and the problems involved, preliminary versions of textbooks were prepared, tested through classroom use at M.I.T. and other institutions, re-evaluated, rewritten, and tried again. Only then were the final manuscripts undertaken.

In general the books in the series will be brief. Most may be covered in a single term or less. Each will be available in either cloth or paper binding. Their brevity and structure (as well as their reasonable price) will make it possible for teachers to select topics and organize courses according to individual needs and preferences.

From reader reviews:

Rose Cotner:

Do you certainly one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this aren't like that. This Special Relativity (The M.I.T. Introductory Physics Series) book is readable by means of you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving possibly decrease the knowledge that want to provide to you. The writer of Special Relativity (The M.I.T. Introductory Physics Series) content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the content but it just different by means of it. So , do you continue to thinking Special Relativity (The M.I.T. Introductory Physics Series) is not loveable to be your top listing reading book?

Barbara Cook:

Nowadays reading books become more than want or need but also be a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The data you get based on what kind of reserve you read, if you want get more knowledge just go with schooling books but if you want sense happy read one together with theme for entertaining for instance comic or novel. The actual Special Relativity (The M.I.T. Introductory Physics Series) is kind of guide which is giving the reader capricious experience.

Donna Miller:

Your reading 6th sense will not betray you actually, why because this Special Relativity (The M.I.T. Introductory Physics Series) reserve written by well-known writer who really knows well how to make book which might be understand by anyone who else read the book. Written with good manner for you, dripping every ideas and publishing skill only for eliminate your hunger then you still question Special Relativity (The M.I.T. Introductory Physics Series) as good book not merely by the cover but also by the content. This is one reserve that can break don't assess book by its protect, so do you still needing yet another sixth sense to pick this particular!?! Oh come on your reading through sixth sense already alerted you so why you have to listening to a different sixth sense.

Barbara Fontenot:

Do you like reading a book? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many problem for the book? But virtually any people feel that they enjoy to get reading. Some people likes examining, not only science book but also novel and Special Relativity (The M.I.T. Introductory Physics Series) or maybe others sources were given understanding for you. After you know how the good a book, you feel want to read more and more. Science book was created for teacher or perhaps students especially. Those textbooks are helping them to add their knowledge. In other case, beside science book, any other book likes Special Relativity (The M.I.T. Introductory Physics Series) to make your spare time far

more colorful. Many types of book like here.
