Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1) Dr Kathleen M Berry

Fashion Design: Creativity and Science comprises a series of pattern engineering training manuals, suitable for students from widely different backgrounds. The drafting systems in the manuals were developed as a result of the extensive experience I gained over many years working in the fields of fashion, education and training. My recently completed academic studies soundly support my earlier findings and provide compelling evidence that has also been instrumental in my decision to develop and publish the manuals, and share my insights with others. Each manual in the series will have a small but important focus on the sciences of structural anatomy (skeletal and muscular), external morphology (shape), applied anthropometry (taking measurements) and mathematics/geometry. I believe that an awareness of these sciences is invaluable, as it provides the underpinning of a solid foundation and framework from which quality patterns are produced, and is therefore the most effective pathway for achieving well fitting garments. As you may be aware, the size and shape of the female body in particular has changed dramatically over the past century. Not surprisingly, these morphological changes have had a major effect on the fit of garments and have created a significant challenge to the fashion industry. I strongly believe that educators, designers, pattern engineers, pattern technicians, dressmakers and fashion enthusiasts must know how to deal with female body size changes not only now but into the future. In many cases, the main players in Government, Industry and Education have not been able to address these changes due to the level of support the industry receives and the absence of current standards. Unfortunately, while the medical profession is well aware of biological changes in female body shape, the fashion industry is yet to address these issues. Therefore industry, students, retailers, and consumers are placed at a disadvantage due to the dilemma of what measurements to use and what size to make (or buy!). The assertion that clothes do not fit because they are made offshore is also very questionable, since overseas manufacturers are faced with the same dilemma: female body size and shape is changing worldwide. The series of compact stand-alone manuals will enable knowledge and skills in pattern engineering to be learnt in a self-paced format. Each manual will give readers a unique advantage at both a national and international level by providing the essential elements of garment and pattern engineering from a new and innovative perspective. Pattern drafting can be an exciting and rewarding activity. It need not be complex, as some have found from earlier negative experiences. Prepare to be surprised by seeing how easy this process can be, by simply following the colour coded systems and step-by-step instructions. This manual, which is the first of the series, will enable readers to produce standard master blocks of a bodice, sleeve and dress for five female figure shape categories. These five figure types were identified in a study "The Changing Size and Shape of the Australian Woman" (Berry, 2001). Data for each figure type obtained in the study are included in this manual. Colour coding identifies the sections relating to each figure type. Step-by-step instructions are clear and concise and associated diagrams are conveniently numbered. You will find I have included some references to geometry which has been used for centuries by certain authors of pattern engineering systems who substituted geometric shapes for particular regions of the body. You may find using geometric principles deepens the awareness of how a pattern is shaped to follow the contours of the human body. The geometric shapes enhance the ability to recognise the wide variation in female body size and shape, and are an additional tool for shape identification.

From reader reviews:

Mark Thomas:

The book Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1)? A number of you have a different opinion about book. But one aim in which book can give many information for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or details that you take for that, it is possible to give for each other; you could share all of these. Book Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1) has simple shape however, you know: it has great and large function for you. You can appearance the enormous world by start and read a guide. So it is very wonderful.

Bruce Benedict:

A lot of people always spent their own free time to vacation or even go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read some sort of book. It is really fun for yourself. If you enjoy the book you read you can spent all day long to reading a reserve. The book Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1) it is extremely good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. When you did not have enough space bringing this book you can buy the e-book. You can m0ore quickly to read this book from your smart phone. The price is not to fund but this book possesses high quality.

Marilyn McDermott:

Don't be worry for anyone who is afraid that this book may filled the space in your house, you can have it in e-book approach, more simple and reachable. This Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1) can give you a lot of buddies because by you investigating this one book you have issue that they don't and make you actually more like an interesting person. That book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't recognize, by knowing more than various other make you to be great men and women. So , why hesitate? We need to have Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1).

Carlos Tabor:

Publication is one of source of information. We can add our information from it. Not only for students and also native or citizen will need book to know the up-date information of year in order to year. As we know

those ebooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. Through the book Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1) we can get more advantage. Don't you to definitely be creative people? Being creative person must like to read a book. Simply choose the best book that appropriate with your aim. Don't be doubt to change your life at this time book Fashion Design ~ Creativity & Science: Module One- Master Blocks: Bodice, Sleeve and Dress for Five Figure Types (Volume 1). You can more pleasing than now.
