Introduction to Electronic Warfare Modeling and Simulation (Artech House Radar Library)

David L. Adamy

Introduction to Electronic Warfare Modeling and Simulation (Artech House Radar Library) David L. Adamy

This unique, new book covers the whole field of electronic warfare modeling and simulation at a systems level, including chapters that describe basic electronic warfare (EW) concepts. Written by a well-known expert in the field with more than 24 years of experience, the book explores EW applications and techniques and the radio frequency spectrum, with primary emphasis on HF (high frequency) to microwave.

A detailed resource for entry-level engineering personnel in EW, military personnel with no radio or communications engineering background, technicians and software professionals, the work helps you understand the basic concepts required for modeling and simulation, as well as fidelity and other practical aspects of simulation design and application. You get clear explanations of important mathematical concepts, such as decibel notation and spherical trigonometry.

This informative reference explains how to facilitate the generation of realistic computer models of EW equipment. Moreover, it describes specific types of EW equipment, how they work and how each is mathematically modeled. The book concludes with a description of the various types of models and simulations and the ways they are applied to training and equipment testing tasks.

From reader reviews:

Marvin Perdue:

In this 21st one hundred year, people become competitive in every way. By being competitive at this point, people have do something to make these people survives, being in the middle of the particular crowded place and notice through surrounding. One thing that at times many people have underestimated that for a while is reading. That's why, by reading a reserve your ability to survive boost then having chance to stay than other is high. In your case who want to start reading the book, we give you this specific Introduction to Electronic Warfare Modeling and Simulation (Artech House Radar Library) book as nice and daily reading e-book. Why, because this book is usually more than just a book.

Connie Sims:

Reading a publication can be one of a lot of activity that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new details. When you read a reserve you will get new information simply because book is one of many ways to share the information or perhaps their idea. Second, reading a book will make anyone more imaginative. When you reading a book especially hype book the author will bring you to imagine the story how the people do it anything. Third, you may share your knowledge to other folks. When you read this Introduction to Electronic Warfare Modeling and Simulation (Artech House Radar Library), it is possible to tells your family, friends along with soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

Lavada Rowlett:

Playing with family in a park, coming to see the sea world or hanging out with good friends is thing that usually you might have done when you have spare time, in that case why you don't try point that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Introduction to Electronic Warfare Modeling and Simulation (Artech House Radar Library), it is possible to enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh seriously its mind hangout people. What? Still don't get it, oh come on its called reading friends.

Mitchell Wilder:

A lot of publication has printed but it is different. You can get it by internet on social media. You can choose the top book for you, science, comedian, novel, or whatever simply by searching from it. It is called of book Introduction to Electronic Warfare Modeling and Simulation (Artech House Radar Library). You can contribute your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make an individual happier to read. It is most essential that, you must aware about reserve. It can bring you from one spot to other place.
