Whereas Newton's method involves only the first derivative, methods discussed in this chapter involve the second or higher. The "classical" methods of this type (such as Halley's, Euler's, Hansen and Patrick's, Ostrowski's, Cauchy's and Chebyshev's) are all third order with three evaluations, so are slightly more efficient than Newton's method. Convergence of some of these methods is discussed, as well as composite variations (some of which have fairly high efficiency). We describe special methods for multiple roots, simultaneous or interval methods, and acceleration techniques. We treat Laguerre's method, which is known to be globally convergent for all-real-roots. The Cluster-Adapted Method is useful for multiple or near-multiple roots. Several composite methods are discussed, as well as methods using determinants or various types of interpolation, and Schroeder's method.

From reader reviews:

Ralph Garibay:

Nowadays reading books are more than want or need but also be a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The details you get based on what kind of e-book you read, if you want send more knowledge just go with knowledge books but if you want feel happy read one along with theme for entertaining like comic or novel. Often the Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) is kind of book which is giving the reader unpredictable experience.

Corey Valenzuela:

Hey guys, do you would like to finds a new book you just read? May be the book with the title Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) suitable to you? Typically the book was written by renowned writer in this era. The actual book untitled Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics)is the one of several books in which everyone read now. This kind of book was inspired a lot of people in the world. When you read this e-book you will enter the new dimensions that you ever know before. The author explained their concept in the simple way, consequently all of people can easily to understand the core of this publication. This book will give you a lot of information about this world now. In order to see the represented of the world with this book.

Tiffany Hassell:

Often the book Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) will bring you to definitely the new experience of reading the book. The author style to clarify the idea is very unique. If you try to find new book to see, this book very suited to you. The book Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) is much recommended to you to study. You can also get the e-book from official web site, so you can more easily to read the book.

Beverly Rosa:

Your reading sixth sense will not betray you, why because this Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) book written by well-known writer who knows well how to make book which might be understand by anyone who read the book. Written inside good manner for you, dripping every ideas and

composing skill only for eliminate your own hunger then you still doubt Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) as good book not only by the cover but also by the content. This is one guide that can break don't evaluate book by its deal with, so do you still needing an additional sixth sense to pick this!?! Oh come on your reading sixth sense already told you so why you have to listening to one more sixth sense.
