The Internet of Things: Key Applications and Protocols

Olivier Hersent, David Boswarthick, Omar Elloumi

The Internet of Things: Key Applications and Protocols Olivier Hersent, David Boswarthick, Omar Elloumi

An all-in-one reference to the major Home Area Networking, Building Automation and AMI protocols, including 802.15.4 over radio or PLC, 6LowPAN/RPL, ZigBee 1.0 and Smart Energy 2.0, Zwave, LON, BACNet, KNX, ModBus, mBus, C.12 and DLMS/COSEM, and the new ETSI M2M system level standard. In-depth coverage of Smart-grid and EV charging use cases.

This book describes the Home Area Networking, Building Automation and AMI protocols and their evolution towards open protocols based on IP such as 6LowPAN and ETSI M2M. The authors discuss the approach taken by service providers to interconnect the protocols and solve the challenge of massive scalability of machine-to-machine communication for mission-critical applications, based on the next generation machine-to-machine ETSI M2M architecture. The authors demonstrate, using the example of the smartgrid use case, how the next generation utilities, by interconnecting and activating our physical environment, will be able to deliver more energy (notably for electric vehicles) with less impact on our natural resources.

Key Features:

- Offers a comprehensive overview of major existing M2M and AMI protocols
- Covers the system aspects of large scale M2M and smart grid applications
- Focuses on system level architecture, interworking, and nationwide use cases
- Explores recent emerging technologies: 6LowPAN, ZigBee SE 2.0 and ETSI M2M, and for existing technologies covers recent developments related to interworking
- Relates ZigBee to the issue of smartgrid, in the more general context of carrier grade M2M applications
- Illustrates the benefits of the smartgrid concept based on real examples, including business cases

This book will be a valuable guide for project managers working on smartgrid, M2M, telecommunications and utility projects, system engineers and developers, networking companies, and home automation companies. It will also be of use to senior academic researchers, students, and policy makers and regulators.

From reader reviews:

Herman Lewis:

Book is definitely written, printed, or created for everything. You can recognize everything you want by a e-book. Book has a different type. As you may know that book is important matter to bring us around the world. Next to that you can your reading skill was fluently. A book The Internet of Things: Key Applications and Protocols will make you to always be smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think that open or reading a new book make you bored. It is far from make you fun. Why they may be thought like that? Have you seeking best book or suited book with you?

Joseph Cash:

The book The Internet of Things: Key Applications and Protocols has a lot info on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. The writer makes some research ahead of write this book. This book very easy to read you can find the point easily after reading this article book.

Daniel Padilla:

With this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple strategy to have that. What you are related is just spending your time very little but quite enough to enjoy a look at some books. One of several books in the top collection in your reading list is usually The Internet of Things: Key Applications and Protocols. This book that is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking right up and review this e-book you can get many advantages.

Donna Muniz:

What is your hobby? Have you heard that will question when you got scholars? We believe that that issue was given by teacher with their students. Many kinds of hobby, All people has different hobby. And also you know that little person including reading or as reading through become their hobby. You have to know that reading is very important in addition to book as to be the factor. Book is important thing to add you knowledge, except your own teacher or lecturer. You find good news or update regarding something by book. Amount types of books that can you choose to adopt be your object. One of them are these claims The Internet of Things: Key Applications and Protocols.
