Mastering Perl for Bioinformatics

James D. Tisdall

Mastering Perl for Bioinformatics James D. Tisdall

Historically, programming hasn't been considered a critical skill for biologists. But now, with access to vast amounts of biological data contained in public databases, programming skills are increasingly in strong demand in biology research and development. Perl, with its highly developed capacities in string handling, text processing, networking, and rapid prototyping, has emerged as the programming language of choice for biological data analysis. *Mastering Perl for Bioinformatics* covers the core Perl language and many of its module extensions, presenting them in the context of biological data and problems of pressing interest to the biological community. This book, along with *Beginning Perl for Bioinformatics*, forms a basic course in Perl programming. This second volume finishes the basic Perl tutorial material (references, complex data structures, object-oriented programming, use of modules--all presented in a biological context) and presents some advanced topics of considerable interest in bioinformatics. The range of topics covered in *Mastering Perl for Bioinformatics* prepares the reader for enduring and emerging developments in critical areas of bioinformatics programming such as:

- Gene finding
- String alignment
- Methods of data storage and retrieval (SML and databases)
- Modeling of networks (graphs and Petri nets)
- Graphics (Tk)
- Parallelization
- Interfacing with other programming languages
- Statistics (PDL)
- Protein structure determination
- Biological models of computation (DNA Computers)

Biologists and computer scientists who have conquered the basics of Perl and are ready to move even further in their mastery of this versatile language will appreciate the author's well-balanced approach to applying Perl's analytical abilities to the field of bioinformatics. Full of practical examples and real-world biological problem solving, this book is a must for any reader wanting to move beyond beginner level Perl in bioinformatics.

From reader reviews:

Donald Howard:

Inside other case, little individuals like to read book Mastering Perl for Bioinformatics. You can choose the best book if you appreciate reading a book. Provided that we know about how is important any book Mastering Perl for Bioinformatics. You can add know-how and of course you can around the world by the book. Absolutely right, due to the fact from book you can understand everything! From your country till foreign or abroad you will find yourself known. About simple matter until wonderful thing you can know that. In this era, we can open a book or maybe searching by internet product. It is called e-book. You can use it when you feel weary to go to the library. Let's study.

Danny Exum:

Reading a book tends to be new life style in this era globalization. With reading you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire their very own reader with their story or even their experience. Not only the storyline that share in the ebooks. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on earth always try to improve their skill in writing, they also doing some analysis before they write to the book. One of them is this Mastering Perl for Bioinformatics.

Peggy Young:

On this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become considered one of it? It is just simple strategy to have that. What you must do is just spending your time very little but quite enough to have a look at some books. One of many books in the top record in your reading list is Mastering Perl for Bioinformatics. This book that is qualified as The Hungry Hills can get you closer in getting precious person. By looking up and review this e-book you can get many advantages.

Gretchen Meehan:

What is your hobby? Have you heard this question when you got scholars? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you know that little person similar to reading or as reading become their hobby. You should know that reading is very important and also book as to be the issue. Book is important thing to include you knowledge, except your teacher or lecturer. You discover good news or update with regards to something by book. Amount types of books that can you choose to adopt be your object. One of them is this Mastering Perl for Bioinformatics.
