Comic Book Math ~ Fun-Schooling Journal: Adding, Writing & Subtracting Games (Ages 6 to 11)

Sarah Janisse Brown

This Fun-Schooling Math and Writing Journal is packed full of fun activities to help children learn! They will practice the skills they need to add, subtract, calculate, use logic, create comics, draw, write, and use their imaginations.

This book is geared toward beginners as well as older children who struggle with basic skills or need to practice their math and writing while having fun. The math is not difficult or confusing. If you have a child who dislikes math, try this to spark a new love for numbers.

Revised and updated April 2016 - NEW "Make Your Own Comic" Activities!

The characters in the book are fun and will remind your child of playing with Legos, robots, Mine-craft, pets, friends!

There are over 100 activities, games, and practice pages in this book to help your child learn. Be sure to spend time teaching your child when he needs help. Some games are designed for TWO people to play together. Almost all the activities are Logic-Based, that means that your child may not need very much help figuring out what to do on each page. The book is best for ages 6 to 11. Many of the games from "The Littlest Math book" are found in this book, but this is a much bigger size.

This book has wide margins and extra white space so your child will have lots of room to draw and doodle while figuring out the math mysteries!

This book is designed to work well for Visual Thinkers and children with ADHD, Asperger's and Dyslexia. It is important for parents and teachers to understand that creative children need white space so they can work out their problems. This book offers a lot more creative freedom than any other math book on the market. The goal is to inspire your child to find joy in numbers, writing, logic, drawing and creativity. While your child delights in this fun method of learning, he or she will be practicing basic math skills.

You may have a children who is older, but never really grasped the meaning behind the math. They might be offended by workbooks that are babyish - but this one is FUN! This book always connects math with meaning so your child can apply mathematics to real life. We want each student to develop strong thinking skills, not just to be able to memorize and repeat facts.

We want each student to love learning and experience the joy of curiosity, discovery and creativity as part of their educational journey.

Ilene Cody:

Reading a reserve tends to be new life style on this era globalization. With studying you can get a lot of information that will give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Plenty of author can inspire all their reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on this planet always try to improve their ability in writing, they also doing some analysis before they write on their book. One of them is this *Comic Book Math ~ Fun-Schooling Journal: Adding, Writing & Subtracting Games (Ages 6 to 11)*.

Rose Hilton:

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their down time with their family, or their friends. Usually they performing activity like watching television, gonna beach, or picnic inside park. They actually doing same every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Might be reading a book might be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of e-book that you should read. If you want to try look for book, may be the publication untitled *Comic Book Math ~ Fun-Schooling Journal: Adding, Writing & Subtracting Games (Ages 6 to 11)* can be great book to read. May be it can be best activity to you.

Theresa Braun:

As a pupil exactly feel bored to be able to reading. If their teacher expected them to go to the library or even make summary for some guide, they are complained. Just very little students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this *Comic Book Math ~ Fun-Schooling Journal: Adding, Writing & Subtracting Games (Ages 6 to 11)* can make you feel more interested to read.
