2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact

Nuclear Regulatory Commission (NRC), International Atomic Energy Agency (IAEA), Environmental Protection Agency, U.S. Senate, U.S. Government

2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S.

Impact Nuclear Regulatory Commission (NRC), International Atomic Energy Agency (IAEA), Environmental Protection Agency, U.S. Senate, U.S. Government

Comprehensive coverage of the crisis at the Fukushima Daiichi Nuclear Power Station - the world's worst nuclear accident since Chernobyl. Ten chapters and over 1,000 pages cover every aspect of the accident from the moment it began on March 11, 2011 following the Great East Japan Earthquake. This magnitude 9.0 earthquake and the subsequent tsunami caused significant damage to four of the six units of Fukushima Daiichi, operated by the Tokyo Electric Power Company (TEPCO), as the result of a sustained loss of both the offsite and on-site power systems. Efforts to restore power to emergency equipment have been hampered or impeded by damage to the surrounding areas due to the tsunami and earthquake. As the fuel rods became partially uncovered, hydrogen gas built up inside the reactor buildings and caused devastating explosions. Radiation was released, and widespread evacuations were ordered.

This thorough compilation of official information and documents includes material from International Atomic Energy Agency (IAEA), the Nuclear Regulatory Commission (NRC), U.S. government agencies, and official sources in Japan - providing an authoritative running narrative of the event as it happened hour by hour, plus important and little-known background data. TEPCO's latest roadmap for achieving a cool shutdown of the damaged reactors and dealing with the accident is covered. Expert testimony before the U.S. Senate and material from the NRC discusses the safety of U.S. nuclear facilities in light of the Fukushima accident; there is extensive discussion of the earthquake risk at California power plants, emergency planning for loss of coolant accidents, and preparations for public health impacts. Information from the EPA and FDA deals with the effects of radiation from Fukushima on the environment and food supply of the United States. A unique chapter provides the running account of TEPCO's problems and radiation leaks from the Kashiwazaki-Kariwa Nuclear Power Station in Niigata Prefecture following a strong earthquake in 2007.

Contents: Chapter 1: Roadmap towards Restoration from the Accident at Fukushima Daiichi Nuclear Power Station; Chapter 2: International Atomic Energy Agency (IAEA) Statements on the Fukushima Nuclear Accident Through mid-April; Chapter 3: Japan Government Statements and Notices About the Fukushima Nuclear Crisis - including News Briefings by Nuclear and Industrial Safety Agency (NISA), Chief Cabinet Secretary Edano, and Prime Minister Kan; Chapter 4: CRS Report for Congress - Fukushima Nuclear Crisis; Chapter 5: Nuclear Regulatory Commission Material; Chapter 6: American Government Agencies; Chapter 7: Energy Department Material; Chapter 8: Testimony before the U.S. Senate; Chapter 9: Tokyo Electric Power Company (TEPCO) Press Releases Regarding the Kashiwazaki-Kariwa Nuclear Power Station after the Niigata-Chuetsu-Oki Earthquake (2007 Incident and Response).

From reader reviews:

Serafina Hayes:

The reserve untitled 2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact is the book that recommended to you to study. You can see the quality of the reserve content that will be shown to you. The language that article author use to explained their way of doing something is easily to understand. The author was did a lot of study when write the book, and so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of 2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact from the publisher to make you a lot more enjoy free time.

Ronald Johnson:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you will get it in e-book technique, more simple and reachable. This kind of 2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact can give you a lot of pals because by you considering this one book you have factor that they don't and make a person more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that probably your friend doesn't realize, by knowing more than additional make you to be great men and women. So , why hesitate? We need to have 2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact.

Donald Benson:

A lot of e-book has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the very best book for you, science, witty, novel, or whatever simply by searching from it. It is referred to as of book 2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact. You can include your knowledge by it. Without causing the printed book, it can add your knowledge and make you actually happier to read. It is most crucial that, you must aware about book. It can bring you from one location to other place.

Doris Avey:

What is your hobby? Have you heard this question when you got learners? We believe that that question was

given by teacher on their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person including reading or as looking at become their hobby. You must know that reading is very important as well as book as to be the thing. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You discover good news or update with regards to something by book. A substantial number of sorts of books that can you take to be your object. One of them are these claims 2011 Fukushima Daiichi TEPCO Nuclear Power Plant Accident: Comprehensive Coverage of Historic Core Melt after the Great East Japan Earthquake, Radiation Releases, Stabilization Roadmap, U.S. Impact.
