Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing)

Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing)

"Machine Learning and Data Mining for Computer Security" provides an overview of the current state of research in machine learning and data mining as it applies to problems in computer security. This book has a strong focus on information processing and combines and extends results from computer security.

The first part of the book surveys the data sources, the learning and mining methods, evaluation methodologies, and past work relevant for computer security. The second part of the book consists of articles written by the top researchers working in this area. These articles deal with topics of host-based intrusion detection through the analysis of audit trails, of command sequences and of system calls as well as network intrusion detection through the analysis of TCP packets and the detection of malicious executables.

This book fills the great need for a book that collects and frames work on developing and applying methods from machine learning and data mining to problems in computer security.

From reader reviews:

Doris Williams:

Book is written, printed, or illustrated for everything. You can learn everything you want by a book. Book has a different type. As you may know that book is important issue to bring us around the world. Alongside that you can your reading ability was fluently. A publication Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing) will make you to always be smarter. You can feel more confidence if you can know about every thing. But some of you think that open or reading some sort of book make you bored. It is not make you fun. Why they could be thought like that? Have you in search of best book or ideal book with you?

James Rose:

This Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing) are reliable for you who want to certainly be a successful person, why. The explanation of this Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing) can be on the list of great books you must have is actually giving you more than just simple examining food but feed you actually with information that probably will shock your preceding knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions at e-book and printed people. Beside that this Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing) forcing you to have an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we know it useful in your day action. So , let's have it and enjoy reading.

Karen Rodriguez:

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them household or their friend. Were you aware? Many a lot of people spent that they free time just watching TV, or playing video games all day long. If you wish to try to find a new activity that's look different you can read the book. It is really fun for you personally. If you enjoy the book which you read you can spent all day long to reading a publication. The book Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing) it is extremely good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore quickly to read this book from a smart phone. The price is not to cover but this book possesses high quality.

Joan James:

Many people spending their period by playing outside having friends, fun activity together with family or just watching TV all day long. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book can definitely hard because you have to take the book everywhere? It alright you

can have the e-book, getting everywhere you want in your Smart phone. Like Machine Learning and Data Mining for Computer Security: Methods and Applications (Advanced Information and Knowledge Processing) which is finding the e-book version. So , try out this book? Let's notice.
