Regression, ANOVA, and the General Linear Model: A Statistics Primer

Peter W. (Wright) Vik

Regression, ANOVA, and the General Linear Model: A Statistics Primer Peter W. (Wright) Vik
Peter Vik's **Regression, ANOVA, and the General Linear Model: A Statistics Primer** demonstrates basic statistical concepts from two different perspectives, giving the reader a conceptual understanding of how to interpret statistics and their use. The two perspectives are (1) a traditional focus on the t-test, correlation, and ANOVA, and (2) a model-comparison approach using General Linear Models (GLM). This book juxtaposes the two approaches by presenting a traditional approach in one chapter, followed by the same analysis demonstrated using GLM. By so doing, students will acquire a theoretical and conceptual appreciation for data analysis as well as an applied practical understanding as to how these two approaches are alike.

From reader reviews:

George Cardenas:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a wander, shopping, or went to often the Mall. How about open or perhaps read a book titled Regression, ANOVA, and the General Linear Model: A Statistics Primer? Maybe it is to be best activity for you. You know beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have other opinion?

Elisabeth Martinez:

As people who live in the modest era should be update about what going on or facts even knowledge to make these people keep up with the era which can be always change and make progress. Some of you maybe can update themselves by reading through books. It is a good choice in your case but the problems coming to you actually is you don't know what kind you should start with. This Regression, ANOVA, and the General Linear Model: A Statistics Primer is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Ralph Dell:

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new details. When you read a guide you will get new information because book is one of many ways to share the information as well as their idea. Second, looking at a book will make an individual more imaginative. When you looking at a book especially fiction book the author will bring you to definitely imagine the story how the personas do it anything. Third, you can share your knowledge to other folks. When you read this Regression, ANOVA, and the General Linear Model: A Statistics Primer, it is possible to tells your family, friends along with soon about yours publication. Your knowledge can inspire average, make them reading a reserve.

Macie Austin:

With this era which is the greater man or woman or who has ability to do something more are more important than other. Do you want to become among it? It is just simple solution to have that. What you have to do is just spending your time little but quite enough to enjoy a look at some books. One of many books in the top collection in your reading list is actually Regression, ANOVA, and the General Linear Model: A Statistics Primer. This book which is qualified as The Hungry Slopes can get you closer in becoming precious person. By looking right up and review this guide you can get many advantages.
