Technological Developments in Networking, Education and Automation

Technological Developments in Networking, Education and Automation

Technological Developments in Networking, Education and Automation includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the following areas:

Computer Networks: Access Technologies, Medium Access Control, Network architectures and Equipment, Optical Networks and Switching, Telecommunication Technology, and Ultra Wideband Communications.

Engineering Education and Online Learning: including development of courses and systems for engineering, technical and liberal studies programs; online laboratories; intelligent testing using fuzzy logic; taxonomy of e-courses; and evaluation of online courses.

Pedagogy: including benchmarking; group-learning; active learning; teaching of multiple subjects together; ontology; and knowledge management.

Instruction Technology: including internet textbooks; virtual reality labs, instructional design, virtual models, pedagogy-oriented markup languages; graphic design possibilities; open source classroom management software; automatic email response systems; tablet-pcs; personalization using web mining technology; intelligent digital chalkboards; virtual room concepts for cooperative scientific work; and network technologies, management, and architecture.

Coding and Modulation: Modeling and Simulation, OFDM technology , Space-time Coding, Spread Spectrum and CDMA Systems.

Wireless technologies: Bluetooth , Cellular Wireless Networks, Cordless Systems and Wireless Local Loop, HIPERLAN, IEEE 802.11, Mobile Network Layer, Mobile Transport Layer, and Spread Spectrum.

Network Security and applications: Authentication Applications, Block Ciphers Design Principles, Block Ciphers Modes of Operation, Electronic Mail Security, Encryption & Message Confidentiality, Firewalls, IP Security, Key Cryptography & Message Authentication, and Web Security.

Robotics, Control Systems and Automation: Distributed Control Systems, Automation, Expert Systems, Robotics, Factory Automation, Intelligent Control Systems, Man Machine Interaction, Manufacturing Information System, Motion Control, and Process Automation.

Vision Systems: for human action sensing, face recognition, and image processing algorithms for smoothing of high speed motion.

Electronics and Power Systems: Actuators, Electro-Mechanical Systems, High Frequency Converters, Industrial Electronics, Motors and Drives, Power Converters, Power Devices and Components, and Power Electronics.

From reader reviews:

James Rogers:

The book Technological Developments in Networking, Education and Automation gives you the sense of being enjoy for your spare time. You may use to make your capable more increase. Book can to be your best friend when you getting stress or having big problem along with your subject. If you can make examining a book Technological Developments in Networking, Education and Automation being your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You could know everything if you like open and read a publication Technological Developments in Networking, Education and Automation. Kinds of book are several. It means that, science reserve or encyclopedia or some others. So , how do you think about this book?

Patricia Welling:

Now a day people that Living in the era everywhere everything reachable by interact with the internet and the resources inside it can be true or not need people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the answer is reading a book. Reading through a book can help persons out of this uncertainty Information especially this Technological Developments in Networking, Education and Automation book because this book offers you rich information and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it you probably know this.

James Chavez:

Nowadays reading books be a little more than want or need but also become a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The data you get based on what kind of guide you read, if you want have more knowledge just go with education books but if you want really feel happy read one together with theme for entertaining for example comic or novel. The Technological Developments in Networking, Education and Automation is kind of book which is giving the reader unstable experience.

Catharine Rosol:

Guide is one of source of expertise. We can add our information from it. Not only for students but in addition native or citizen need book to know the up-date information of year to help year. As we know those books have many advantages. Beside many of us add our knowledge, could also bring us to around the world. By book Technological Developments in Networking, Education and Automation we can have more advantage. Don't you to definitely be creative people? To get creative person must prefer to read a book. Just simply choose the best book that appropriate with your aim. Don't be doubt to change your life with this book Technological Developments in Networking, Education and Automation. You can more pleasing than now.
